

DEVICE AND METHOD FOR SELECTING AND RECORDING AN IMAGE**ABSTRACT OF THE DISCLOSURE**

The invention relates to a device for selecting and recording an image which forms a part of an irradiated or emissive object, comprising: an object holder for positioning the object, a mirror for reflecting an image of the object, and a displaceable camera for selecting a part of the image from the reflected image of the object. The invention also relates to a method for selecting an image to be recorded with a camera which forms a part of an irradiated or emissive object.
